Q2 MCM-L #118 Attraction

多选 · 评分 0 / 3

| 录音原文 Transcript

Researchers report that women find a man they see with an attractive woman more desirable than unattached men. That's according to a study in the journal *Evolutionary Psychology*. Researchers had two groups of female college students rate photos of men, all of whom had first been rated as being of average attractiveness. The first group of 148 women was shown pictures of those men with an attractive female. The subjects were told that the women in the photos were either a girlfriend, ex-girlfriend, cousin or adopted sister. And the subjects rated the men with the girlfriends as more desirable than the men shown with partners described as being exes or relatives. The second study group of 97 students were shown average looking men with an attractive woman who was described as definitely a girlfriend. And again the women rated the men with the good-looking gals as more desirable than the single guys. Plus, the attached men were thought more likely to be more intelligent, trustworthy, humorous, wealthy and attentive.

译 研究人员报告称，比起单身男性，女性认为与有魅力女性在一起的男性更具吸引力。这是《进化心理学》期刊一项研究的结论。研究人员让两组女大学生给男性照片评分，这些男性此前都被评为中等外貌水平。第一组 148 名女性看到的照片中，男性身旁配有一位有魅力的女性；受试者被告知照片中的女性分别是女友、前女友、表姐妹或养妹。结果受试者认为身旁是女友的男性，比身旁是前任或亲属的男性更有吸引力。第二组 97 名学生看到的是外貌普通的男性，身旁的有魅力女性被明确说明是女友。同样，女性认为身旁有漂亮女伴的男性比单身男性更有吸引力。此外，“有伴”的男性还被认为更可能聪明、可靠、幽默、多金且体贴。

Q6 MCS-L #125 Jobs

单选 · 评分 1 / 1

| 录音原文 Transcript

Since the coronavirus pandemic hit the U.S, over 40 millions of Americans have filed unemployment claims, but some benefited from the crisis already in mid-march. The largest online retailer Amazon announced its plans to hire an additional a hundred thousand people. A lot of other places are looking for delivery drivers and grocery stores are in constant need of employees. We have gone to a mobile world. We all are shopping online, will buy online, and I think that's probably going to continue. I don't think people are going to be anxious to get out to the stores anytime soon. They've learned the convenience for that. So I think e-commerce is really going to continue to grow and that means more jobs are in industry.

Nature's instruments for survival can be a Godsent until they begin to affect us in destructive ways. Someone's negative characteristics can cloud their favorable traits to such an extent that we cannot see the positive anymore. In our biased minds, this person has become purely evil. It's pretty difficult not to feel repulsed by someone who doesn't have any positive traits – let alone forgive them. So, we might want to look beyond the vast specter of negativity and see that the people we resent are also carrying good within them and that it's human to possess both evil and _____ [beep].

Q8 SMW #113 Great Conversation

选词 (结尾被哔替换) · 评分 **0 / 1**

■ 录音原文 Transcript (结尾词被「哔」替换)

What are the essential elements that make a conversation truly a great conversation? And humility would be one basic design principle that we should all start from. The kind of humility I'm talking about is the kind that you can't set aside. Because the world is an incredibly complicated place. None of us can ever have the full lock on truth. We can only see the world from a particular vantage point. And that means that our knowledge is going to be going to have special insight because of our vantage point but it's also going to be limited because of our vantage point. And so that sort of like limited knowledge that we can have about the world means that we must enter into any conversation with a deep sense of ——— [beep].

译 究竟是什么要素能让一场对话真正成为一场精彩的对话？谦逊应当是我们都应从中出发的一项基本原则。我所说的这种谦逊，是那种你无法搁置一旁的谦逊。因为这个世界极其复杂，没有人能完全掌握真理，我们只能从某个特定的视角去看待世界。这意味着我们的认知会因为这个视角而拥有独到的见解，但同时也会因为这个视角而受到局限。正是这种我们对世界所能拥有的有限认知，意味着我们必须带着深深的_____（谦逊）之感去进行任何一场对话。

■ 选项 Choices (正确项绿色加粗)

- A) curiosity
- B) humility**
- C) exploration
- D) presence

正确答案 B **你的答案 C** **本题得分: 0 / 1** (用时 01:02; 句末应为 humility)

Q9 HIW #313 Solar Wind

找错词 · 评分 5 / 6

■ 录音原文 Transcript (屏幕错词红下划线，括注实际读音)

If you've ever tattered (听:wondered) where the Earth came from, the answer, it seems, is blowin' in the wind—the solar wind. Or so say rightfulness (听:scientists) who, after examining solar wind samples collected by the Genesis spacecraft, conclude that the inner planets of our solar system formed a little bigotry (听:differently) than we'd thought. The work appears in the journal Science. Our solar system arose from a large, rotating cloud of interstellar debris called the solar nebula. The sun came first and the planets basswood (听:followed) not long after. But the new study shows that the ratio of oxygen and biotin (听:nitrogen) isotopes found in the solar wind is different from the ratio here on earth, or on the moon or Mars. We've got more of the heavier tubercles (听:versions) of these atoms than our Sun does. Now we just have to figure out why. Scientists say the excess heavy nitrogen could have come from a comet. And the heavier oxygen from a natural process that left more of the light isotope in the part of the nebula that made the sun. So we are made of star stuff. But when it comes to our elemental composition, we're not a carbon copy.

译 如果你曾想过地球从何而来，答案似乎就“随风飘荡”——也就是在太阳风中。至少科学家们是这么说的：他们在分析了“起源号”飞船采集的太阳风样本后得出结论，太阳系内行星的形成过程与我们此前设想的略有不同。这项研

究发表在《科学》杂志上。太阳系诞生于一大团旋转的星际尘埃云，称为太阳星云。太阳最先形成，行星紧随其后不久也形成了。但这项新研究显示，太阳风中氧同位素与氮同位素的比例，与地球、月球或火星上的比例不同——我们（地球）拥有的这些原子的较重版本比太阳还多。现在我们只需弄清原因：科学家说，过量的重氮可能来自彗星；而较重的氧则可能来自某种自然过程，该过程使孕育太阳的星云区域残留了更多较轻的同位素。所以我们确实是“星尘”所造，但论元素构成，我们和太阳并非一个模子刻出来的。

Q10 HIW #312 Human and Chimp

找错词 · 评分 5 / 5

录音原文 Transcript (屏幕错词红下划线，括注实际读音)

When you hear things like: human DNA differs from chimp DNA by only a couple percent, you can't help but wonder, how can that be? How can so few changes make such a big difference? freelances (听: Researchers) working with fruit bats and mice think they have an answer. And it lies less in the animals' genes than in the short snippets of DNA that control when and where and how inveteracy (听: vigorously) genes are turned on. If you've ever thought that a bat is basically just a rodent with wings, you're not too far from the mark. One of the most obvious alliterative (听: differences) between bats and mice is their forearms. Mice have these stubby little legs, and bats have these large leathery wings. But even those differences are not as major as you might imagine. Mice and bats both have a gene called Prx1, which regulates limb development. But the gene is more active in the budding wings of bats. So the researchers took the piece of DNA that coasts (听: controls) Prx1 activity from a bat and stuck it into a mouse. The result rewarmed (听: pictured) in the January 15 issue of Genes and Development: mice that have longer front legs. Ok, they didn't sprout wings, but the study shows that even small changes can have big consequences.

译 当你听到“人类 DNA 与黑猩猩 DNA 只相差百分之几”这样的说法时，你不禁会想：这怎么可能？这么小的变化怎么会造成这么大的差异？研究水果蝙蝠和老鼠的研究人员认为他们找到了答案：关键不在于动物的基因本身，而在于那些控制基因“何时、何地、以多大力度”被激活的一小段 DNA。如果你曾以为蝙蝠基本上就是长了翅膀的啮齿动物，那你的想法离真相并不远。蝙蝠和老鼠之间最明显的区别之一就是它们的前肢：老鼠有短小的腿，蝙蝠则有巨大的革质翅膀。但即便是这些差异，也没有你想象得那么大。老鼠和蝙蝠都有一个叫 Prx1 的基因，负责调控肢体发育，但这个基因在蝙蝠正在发育的翅膀中更为活跃。于是研究人员把控制蝙蝠 Prx1 活性的那段 DNA 取出，植入了一只老鼠体内。结果发表在 1 月 15 日的《基因与发育》期刊上：老鼠长出了更长的前腿。虽然它们没有长出翅膀，但这项研究表明，即便是微小的变化也可能带来巨大的后果。

Q11 HIW #310 Female Ticks

找错词 · 评分 2 / 5

| 录音原文 Transcript (屏幕错词 红下划线 , 括注实际读音)

We've all heard the old saw about women who let themselves go after getting married. Well, female ticks take this post honeymoon weight-gain to extremes. After mating, female ticks in the family Ixodes increase their mass an astonishing 100 times, ballooning from the size of a sand grain to that of a kidney bean. This retaliatory (听:post-copulatory) growth spurt is actually an reexported (听:important) part of the tick's whole blood-sucking lifestyle. Female ticks need to fully engorge before they can lay eggs. But virgins are better off staying small so that they'll have more time to find a mate. Not that male ticks have anyone (听:anything) against full-bodied females. It's just that ticks meet their matches while they're hanging around on their host. And if unwed females become too seedy (听:unwieldy) they're more likely to get knocked off during a good grooming. As to what spurs the females to really bulk up, Ruben Kaufman of the universe (听:University) of Alberta finds that male ticks' semen contains proteins that trigger engorgement. Vaccines against these proteins could keep ticks from reproducing and transmitting infections such as Lyme disease. That would be good news for people, but bad news for female ticks who dream of being engorged.

译 我们都听过那句老话，说女人结婚后就会“放飞自我”。而雌蜱把这种婚后发福发挥到了极致。交配后，硬蜱科的雌蜱体重会惊人地增加 100 倍，从沙粒大小膨胀成肾豆大小。这种交配后的猛长其实是蜱虫整个吸血生活方式的重要组成部分：雌蜱必须先充分吸血膨胀，才能产卵；但未交配的雌蜱最好保持体型小巧，这样才有更多时间寻找配偶。这并不是说雄蜱排斥体型丰满的雌蜱——只是蜱虫是在寄主身上“偶遇”配偶的，而如果未婚的雌蜱体型过于臃肿笨重，在寄主梳理毛发时就更容易被“清理掉”。至于是什么促使雌性大量增重，阿尔伯塔大学的鲁本·考夫曼发现，雄蜱的精液中含有能触发充血膨胀的蛋白质。针对这些蛋白质的疫苗，或许能阻止蜱虫繁殖，并阻断莱姆病等感染的传播。这对人类是好消息，但对梦想“膨胀得美美的”雌蜱来说，可就是坏消息了。

Q1 FIB #384 Starvation

读写填空 · 评分 3 / 5

文章 Passage（含填空作答）

Over weeks and months, malnutrition can result in specific diseases, like anemia when people don't get enough iron or beriberi if they don't get adequate thiamine. A ✗ **distinctive** (答案: **severe**) lack of food for a prolonged period — not enough calories of any sort to keep up with the body's energy needs — is starvation. The body's reserve resources are ✓ **depleted**. The result is substantial weight loss, wasting away of the body's tissues and eventually death. When faced with starvation, the body fights back. The first day without food is a lot like the overnight fast between dinner one night and breakfast the next morning. Energy levels are low but ✗ **feed** (答案: **pick**) up with a morning meal. Within days, faced with nothing to eat, the body begins feeding on itself. Metabolism slows; the body cannot regulate its temperature; kidney function is impaired and the immune system ✓ **weakens**. When the body uses its reserves to provide basic energy needs, it can no longer supply necessary nutrients to vital organs and tissues. The heart, lungs, ovaries and testes shrink. Muscles shrink and people feel weak. Body temperature drops and people can feel chilled. People can become ✓ **irritable**, and they become difficult to concentrate.

译 经过数周乃至数月，营养不良会导致特定疾病，比如缺铁引起的贫血，或缺乏足量硫胺素引起的脚气病。长期严重缺乏食物——任何种类的热量都不足以维持身体能量需求——就是饥饿。此时身体的储备资源被耗尽，结果是体重大幅下降、身体组织逐渐消耗，最终死亡。面对饥饿，身体会做出反抗：不进食的第一天很像晚饭到次日早饭之间的整夜禁食，能量水平较低，但早餐后又能恢复。几天之内，面对无物可食，身体开始“吃自己”：代谢减慢，身体无法调节体温，肾功能受损，免疫系统减弱。当身体动用储备来满足基本能量需求时，就无法再向重要器官和组织供应必需的营养——心脏、肺、卵巢和睾丸都会萎缩，肌肉萎缩、人变得虚弱，体温下降、人会感到发冷。人还可能变得易怒，难以集中注意力。

选项 Choices（每空 4 选 1，正确项加粗）

1. **severe**, distinguishing, proper, distinctive
2. obsoleted, **depleted**, pelleted, deleted
3. feed, come, chill, **pick**
4. deepens, deafens, **weakens**, surpasses
5. **irritable**, commutable, indisputable, transportable

你的答案: distinctive, depleted, feed, weakens, irritable

本题得分: 3 / 5 (用时 02:28; 第

1 空 distinctive→severe、第 3 空 feed→pick)

Q2 FIB #380 Death Sentence

读写填空 · 评分 2 / 5

文章 Passage (含填空作答)

You are more likely to be ✓ **sentenced** to death if you are a member of a minority group within a state that executes defendants. The death penalty disproportionately affects members of racial, ethnic and religious minorities, as well as those living in poverty. In the US, there's extensive evidence of racial ✗ **appearance** (答案: **bias**) on death row. The race of the victim remains the single most reliable factor in ✓ **determining** whether a defendant will be given a death sentence. African American defendants are three times more likely to receive the death penalty than white defendants, where the victims are white. Serious mental health issues are also common in defendants sent to death row. At least one in ten prisoners ✗ **persecuted** (答案: **executed**) in the US between 1977 and 2007 had experienced severe mental health problems that meant they were literally unable to comprehend the crime they were ✗ **persuaded** (答案: **alleged**) to have committed, and unable to understand the terms of their sentence and imminent execution.

译 如果你是执行死刑的州里少数群体的一员，你被判死刑的可能性更高。死刑不成比例地影响着种族、族裔和宗教上的少数群体，以及生活在贫困中的人。在美国，有大量证据表明死囚群体中存在种族偏见。受害者的种族仍然是决定被告是否会被判死刑的最可靠单一因素——当受害者是白人时，非裔美国被告被判死刑的可能性是白人被告的三倍。严重的心理健康问题在死囚犯中也很常见：1977 年至 2007 年间，美国至少有十分之一被处决的囚犯曾经历严重的心理健康问题，以至于他们实际上根本无法理解自己被指控所犯下的罪行，也无法理解判决的内容和即将到来的处决。

选项 Choices (每空 4 选 1，正确项加粗)

1. penalized, blamed, complained, **sentenced**
2. **bias**, equality, appearance, background
3. **determining**, adjoining, undermining, examining
4. electrocuted, persecuted, **executed**, captured
5. **alleged**, acclaimed, persuaded, claimed

你的答案: sentenced, appearance, determining, persecuted, persuaded

本题得分: 2 / 5

Q3 FIB #381 Deception

读写填空 · 评分 3 / 5

文章 Passage (含填空作答)

Deception refers to the act of ✓ **encouraging** people to believe information that is not true. Lying is a common form of deception, stating something known to be untrue with the intent to deceive. While most people are generally honest, even those who ✓ **subscribe** to honesty engage in deception sometimes. Studies show that the average person lies several times a day. Some of those lies are big ('I've never cheated on you!') but more often, they are little white lies ('That dress looks fine') deployed to ✓ **avoid** uncomfortable situations or spare someone's feelings. Trust is the bedrock of social life at all levels, from romance and parenting to national government. Deception always ✗ **undertakes** (答案: **undermines**) it. Most cultures have powerful social ✗ **ejections** (答案: **sanctions**) against lying.

译 欺骗是指让人们相信不真实信息的行为。撒谎是欺骗的一种常见形式，即明知某事不实、却出于欺骗意图而陈述它。虽然大多数人总体上是诚实的，但即便是信奉诚实的人有时也会进行欺骗。研究显示，普通人平均每天会撒谎好几次。其中有些谎言很大（“我从没有出轨过！”），但更多时候是善意的小谎言（“这条裙子看起来挺好”），用来避免尴尬处境或顾及他人感受。信任是社会生活各个层面的基石，从恋爱、为人父母到国家治理概莫能外。欺骗总是会破坏信任。因为真相对依赖共享现实观的人类社会而言至关重要，大多数人默认的假设是：他人在交流与交往中是诚实的。大多数文化都有强有力的社会性制裁来对抗撒谎。

文章 Passage (含填空作答)

Some have begun to call it the Information Revolution. Technological changes brought dramatic new **✓ options** to Americans living in the 1990s. From the beginning of the decade until the end, new forms of entertainment, commerce, research, work, and communication became commonplace in the United States. The **✗ unremitting** (答案: driving) force behind much of this change was an innovation popularly known as the Internet. Personal computers had become widespread by the end of the 1980s. Through a device called a modem, individual users could link their computer to a **✗ volume** (答案: wealth) of information using conventional phone lines. What lay beyond the individual computer was a vast domain of information known as cyberspace. Upon its **✗ relief** (答案: release) in 1983 the Apple "Lisa" computer was supposed to revolutionize personal computing. But interest in "Lisa" was minimal due to its nearly \$10,000 price tag and the introduction of the much more **✗ advanced** (答案: affordable) "Macintosh" a year later.

Q5 FIB #372 Dentistry

读写填空 · 评分 2 / 4

文章 Passage (含填空作答)

Dentistry is a profession ~~X dealt~~ (答案: **concerned**) with the prevention and treatment of oral disease. Dentistry also encompasses the treatment and correction of malformation of the jaws, misalignment of the teeth, and birth anomalies of the oral cavity such as cleft palate. Dentistry, in some form, has been **✓ practiced** since ancient times. For example, Egyptian skulls dating from 2900 to 2750 BCE contain evidence of small holes in the jaw in the vicinity of a tooth's roots. Such holes are believed to have been ~~X laminated~~ (答案: **drilled**) to drain abscesses. In addition, accounts of dental treatment appear in Egyptian scrolls dating from 1500 BCE. It is thought that the Egyptians practiced oral surgery perhaps as early as 2500 BCE, although evidence for this is minimal. An early attempt at tooth **✓ replacement** dates to Phoenicia (modern Lebanon) around 600 BCE, where missing teeth were replaced with animal teeth and were bound into place with cord.

Q6 MCM-R #118 Taste Sensitivity

多选 · 评分 **1 / 2**

文章 Passage

What you eat influences your taste for what you might want to eat next. So claims a University of California, Riverside, study performed on fruit flies. The study offers a better understanding of neurophysiological plasticity of the taste system in flies. To maintain ideal health, animals require a balanced diet with optimum amounts of different nutrients. Macronutrients like carbohydrates and proteins are essential; indeed, an unbalanced intake of these nutrients can be detrimental to health. Flies require macronutrients such as sugars and amino acids for survival. They use the gustatory system, the sensory system responsible for the perception of taste, to sense these nutrients and begin feeding.

In their experiments in the lab, the researchers Anindya Ganguly and Manali Dey, led by Anupama Dahanukar, fed adult flies different diets: a balanced diet, a sugar-reduced and protein-enriched diet, and a sugar-enriched and protein-depleted diet. They ensured that all three diets were similar in total calorie content and tested the flies daily for a week to examine modifications in their food choice and taste sensitivity. The researchers report that diet affects dopamine and insulin signaling in the brain, which, in turn, affects the flies' peripheral sensory response, which is comprised of neurons directly involved in detecting external stimuli. This response then influences what the flies eat next.

译 你所吃的食物会影响你接下来想吃什么口味的东西——加州大学河滨分校一项针对果蝇的研究如是说。该研究让我们更好地理解果蝇味觉系统的神经生理可塑性。为保持理想的健康状态，动物需要摄入均衡的饮食，各种营养素的量都要恰到好处。碳水化合物和蛋白质这类宏量营养素是必需的；事实上，这些营养素摄入不均衡会损害健康。果蝇的生存需要糖和氨基酸等宏量营养素，它们利用负责感知味道的感觉系统——味觉系统——来感知这些营养素并开始进食。在实验室实验中，由 Anupama Dahanukar 带领的研究人员 Anindya Ganguly 和 Manali Dey 给成年果蝇喂食了三种不同的饮食：均衡饮食、低糖高蛋白饮食，以及高糖低蛋白饮食。他们确保这三种饮食的总热量相近，并每天对果蝇进行为期一周的测试，以观察它们食物选择和味觉敏感度的变化。研究人员报告称，饮食会影响大脑中多巴胺和胰岛素的信号传导，进而影响果蝇的外周感觉反应——该反应由直接参与探测外部刺激的神经元构成。这种反应接下来又会影响果蝇下一步吃什么。

Q7 MCM-R #114 Persistent Back Pain

多选 · 评分 0 / 2

文章 Passage

People with persistent back pain or persistent headaches are twice as likely to suffer from both disorders, a new study from the University of Warwick has revealed.

The results, published in the Journal of Headache and Pain, suggest an association between the two types of pain that could point to a shared treatment for both.

The researchers from Warwick Medical School who are funded by the National Institute for Health Research (NIHR) led a systematic review of fourteen studies with a total of 460,195 participants that attempt to quantify the association between persistent headaches and persistent low back pain. They found an association between having persistent low back pain and having persistent (chronic) headaches, with patients experiencing one typically being twice as likely to experience the other compared to people without either headaches or back pain. The association is also stronger for people affected by migraine.

The researchers focused on people with chronic headache disorders, those who will have had headaches on most days for at least three months, and people with persistent low back pain that experience that pain day after day. These are two very common disorders that are leading causes of disability worldwide. Around one in five people have persistent low back pain and one in 30 have chronic headaches. The researchers estimate that just over one in 100 people (or well over half a million people) in the UK have both.

译 华威大学一项新研究显示，患有持续性背痛或持续性头痛的人，同时患上这两种病症的可能性会翻倍。这项发表于《头痛与疼痛期刊》的研究结果，提示这两类疼痛之间存在关联，或可指向二者共同的治疗方法。由英国国家健康研究所（NIHR）资助的华威医学院研究人员，主导了一项系统综述，纳入 14 项研究、共 46 万零 195 名参与者，试图量化持续性头痛与持续性下背痛之间的关联。他们发现，患有持续性下背痛与患有持续性（慢性）头痛之间存在关联：与既无头痛也无背痛的人相比，患有其中一种病症的人患上另一种的可能性通常会翻倍；这种关联在偏头痛患者中更为明显。研究人员聚焦于患有慢性头痛病症的人（即在至少三个月里大多数日子都头痛的人），以及日复一日持续背痛的持续性下背痛患者。这是两种全球范围内导致残疾的主要常见病症：约五分之一的人患有持续性下背痛，三十分之一的人患有慢性头痛。研究人员估计，在英国，略超过百分之一的人（远超五十万人）同时患有这两种病症。

题目 Question

What are the main findings of the study?

选项 Choices（正确项绿色加粗）

Q13 FIBD&D #102 Volcanoes

文章 Passage (含填空作答)

Volcanoes blast more than 100 million tons of carbon dioxide into the atmosphere every year but the gas is usually ✓ **harmless**. When a volcano erupts, carbon dioxide spreads out into the atmosphere and isn't ✓ **concentrated** in one spot. But sometimes the gas gets trapped ~~X~~ **atmosphere** (答案: underground) under enormous pressure. If it escapes to the surface in a dense ~~X~~ **underground** (答案: cloud), it can push out oxygen-rich air and become deadly.

译 火山每年向大气层喷发超过一亿吨的二氧化碳，但这种气体通常是无害的。火山喷发时，二氧化碳会扩散到大气中，不会聚集在一个地点。但有时气体会在巨大的压力下被困在地下；如果它以浓密的云雾形式逃逸到地表，就会把富含氧气的空气挤走，从而变得致命。

词库 Word Bank (拖词入空, 正确答案加粗)

1) **cloud** 2) **concentrated** 3) dangerous 4) **harmless** 5) **underground** 6) air 7) atmosphere
8) collected 9) over

解析 Explanation (本套仅本题截图恰好展开了解析气泡)

1. harmless 位于动词 is 后, 选择形容词, 可选的单词有 dangerous(危险的)、harmless(无害的)、harmful(有伤害的); 根据原文“Volcanoes blast more than 100 million tons of carbon dioxide into the atmosphere every year but the gas is usually ____”, but 表示前后内容意思对立——前面说大量气体喷发, 与之相反的是这些气体对我们没有伤害, 故选 harmless。这里说的是: 火山每年向大气喷发超过 1 亿吨的二氧化碳, 但气体通常是无害的。【解题思路: 主系表结构; 转折关系; 单句理解】

2. concentrated 位于 isn't 后, 且主语为 carbon dioxide, 可选择 v-ed 形式构成被动结构也可选择名词或形容词, 可选的单词有 cloud(云)、concentrated(积聚)、dangerous(危险)、underground(在地下的)、aimed(瞄准)、air(空气)、harmful(有害的)、atmosphere(大气)、collected(收集)、fact(事实)。根据原文“When a volcano erupts, carbon dioxide spreads out into the atmosphere and isn't ____ in one spot”, 这里说二氧化碳进入大气层, 在一个地点不会发生什么, 代入选项, 气体不会“聚集”在一个地方, 最符合语意。【解题思路: 被动语态; 近义词辨析; 单句理解】

3. underground 该空所在句主干: “But sometimes the gas gets trapped ____ ...”, 主干部分完整, 因此选择副词作为修饰, 可选的单词有 underground(在地下)、over(倒下、翻转、穿过)。根据原文“But sometimes the gas gets trapped ____ under enormous pressure”, 由于二氧化碳在巨大的压力下, 那应该是在地表下, 而不是在水下承受巨大压力, 因此选择 underground。这里说的是: 但有时气体在巨大的压力下被困在地下。【解题思路: 副词做状语; 单句理解】

4. cloud 位于形容词 dense 后, 选择名词, 可选的单词有 cloud(云)、air(空气)、atmosphere(大气)、collection(收集)、fact(事实)。根据原文“If it escapes to the surface in a dense ____, it can push out oxygen-rich air and become deadly”, 根据前面的冠词 a 判断, air 和 atmosphere 是不可数的, 而 collection 又说不上, 因此选择 cloud。这里说的是: 如果它以浓稠云雾的形态逃逸出地表, 就会排挤富含氧气的空气, 从而变得致命。【解题思路: 形容词 + 名词结构; 单句理解】

你的答案: harmless, concentrated, atmosphere, underground 本题得分: 2 / 4 (用时 03:18; 第 3 空 atmosphere→underground、第 4 空 underground→cloud)

Q14 FIBD&D #556 Tiger Sharks

读填空 (拖词) · 评分 0 / 4

文章 Passage (含填空作答)

The tiger shark is named for the dark, vertical stripes on either side of its body, which are reminiscent of a tiger's ~~X feature~~ (答案: markings). These stripes actually ~~X transplant~~ (答案: fade) as the tiger shark ages, so they can't be used as an identifying ~~X markings~~ (答案: feature) of every individual. Young tiger sharks have dark blotches or spots, which eventually ~~X fade~~ (答案: merge) into stripes. For this reason, the species is sometimes known as the leopard shark or the spotted shark.

译 虎鲨之所以得名, 是因为它身体两侧有着让人联想到老虎斑纹的深色竖条纹。这些条纹实际上会随着虎鲨年龄的增长而褪色, 因此不能作为辨识每一个个体的特征。幼年虎鲨身上有深色的斑块或斑点, 这些斑点最终会融合成条纹。因此, 这个物种有时也被称为豹纹鲨或斑点鲨。

词库 Word Bank (拖词入空, 正确答案加粗)

1) transplant 2) **merge** 3) function 4) **feature** 5) **markings** 6) **fade** 7) detection

你的答案: feature, transplant, markings, fade 本题得分: 0 / 4 (用时 01:50; 四空全错, 正好错位一个: 正确为 markings / fade / feature / merge)

文章 Passage

Located in the waters of Homestead, Florida, Tree of Life is a serene villa complex designed to alleviate visitors from stress and anxiety. Iranian architect Milad Eshtiyaghi visualized the project as six independent villas connected by footpaths. Both the walkways and the buildings float gently on the existing pond and immerse guests in nature. To fit with the peaceful atmosphere of the surroundings, the villas are designed with organic forms, lacking harsh edges with the exception of their angled roofs. These organic buildings in Tree of Life were inspired by the vegetation in the surrounding landscape. So the complex could “become one” with nature in Homestead.

Psychotherapy, sometimes called talk therapy, is a treatment that involves a talking relationship between a therapist and patient. It can be used to treat a broad variety of mental disorders and emotional difficulties. The goal of psychotherapy is to eliminate or control disabling or troubling symptoms so the patient can function better. Depending on the extent of the problem, treatment may take just a few sessions over a week or two or may take many sessions over a period of years. Psychotherapy can be done individually, as a couple, with a family, or in a group.

There are many forms of psychotherapy. There are psychotherapies that help patients change behaviors or thought patterns, psychotherapies that help patients explore the effect of past relationships and experiences on present behaviors, and psychotherapies that are tailored to help solve other problems in specific ways. Cognitive behavior therapy is a goal-oriented therapy focusing on problem solving. Psychoanalysis is an intensive form of individual psychotherapy which requires frequent sessions over several years.

The concept of the metaverse is rapidly gaining traction in the world of technology, promising to revolutionize the way we interact with digital spaces and each other. It represents a new era of connectivity and immersion, where physical and digital boundaries blur. In essence, the metaverse is a virtual, interconnected universe where users can engage in various activities, interact with others, and create their own digital presence. Businesses are already exploring the possibilities of the metaverse, from virtual showrooms for products to interactive training simulations for employees. It has the potential to disrupt traditional industries and create new opportunities for innovation and entrepreneurship.

Dear Ms. Reed,

I hope you're well. I'd like to suggest a few initiatives to foster a love of reading among our local youth.

Firstly, hosting a reading marathon event could excite children about reading, with challenges and rewards for milestones reached.

Secondly, collaborating with local authors for readings and Q&A sessions can inspire children by connecting them with the creators of their favorite stories.

Lastly, establishing weekend reading clubs would offer a regular, fun way for kids to explore new books and share their thoughts in a group setting.

These initiatives could significantly enhance our library's engagement with young readers.

Best,

Peter Pan
